IITM: This is just simply stunning. Uh, that stuff lands on the ground, we live with it, it's in our beds, and in our lungs... it crosses the blood brain barrier. Humans are eating chemtrails, basically... meanwhile certain key minerals are removed from the soil, and an artificial layer is being added from above. Nature has almost completely left the building... except... all of this will be and is part of the cleansing. Who wants to truly live, and who wants to die? Mother earth wins... those who willfully poison her, are leaving this planet, and they have my blessings and compassion, as does anyone who is willfully trying to depopulate this planet.

Humanity must comprehend, they are nearly a quantum leap ahead of where regular people believe science is. It is 'advanced technology' beyond our comprehension... in the air we are breathing.

Guys... our society is broken, how can there be all of this magnetic dust everywhere, and people think it has nothing to do with them or their health or their quality of life, or the mystery towers?

So many are willing to let the earth burn, as long as their bed doesn't burn first.
